

LSX 4100, the super-powered space saver

Well-suited for all environments where space is limited, but you can't afford to compromise on functionality. The LSX 4100 does it all: TITO, bill breaking, jackpot processing, ATM, e-check and cash advance. It's the perfect solution for spots that don't require super-high cash capacity, but still require super-high functionality.

Ultra-slim design

Our entire LightSpeed Kiosk series has been carefully designed to provide robust service capability, high dependability, easy serviceability and enhanced security, all in slim profile design. This allows our clients to achieve maximum value for the floor space occupied by their kiosk solution, while saving more room for revenue-producing slot machines.

Enhanced security

All of our kiosks feature enclosed bill paths, a discreet PIN pad location and enhanced privacy screens.
